2004 Curriculum Implantology DGI
2004 Msc. Implantology University Vienna
2005 ITI Membership
2008 Member Bonemanagment Kollegium
2011 Studies for PEG membranes Straumann
2012 Clinical Guide book for Anesto products
2013 Key Opinion Leader botiss biomaterials

THE AIM OF THIS COURSE IS

to provide the participants knowledge in functional and aesthetic implant placement. The Management of complex cases is in the focus as well as to learn from failures. Tips and tricks for the daily work will be presented by Dr. Mario Kirste.

FIRST DAY PROGRAM

Dr. Kirste will explain the usage of the Straumann BLT Implant System, the differences to the other Straumann Implant concepts, different shapes, surfaces and prosthetic connections. Additionally he will discuss with you about different bonesubstituts and you will learn effective techniques for the soft tissue management. See the importance of different suture materials and suture techniques. After the theoretical part he will show in two or more implant live procedures, different treatment concepts for sinus floor elevations, the indirect Summers lift, the balloon lift technique described from Prof. Benner, Dr. Heuckmann, Dr. Bauer and certainly the classical treatments from Prof. Hilt Tatum, the direct sinus floor elevation. Last but not least he will explain a Hydrolift case, for soft elevation of the Schneiderian membrane.

After the first day we invite you to join for a dinner in a cozy restaurant nearby.

SECOND DAY PROGRAM

The second day will start with two live surgeries. The first intervention is a sinus floor elevation with implant and bonering placement. The next live surgery is an aesthetic reconstruction in the front teeth region with human bone wall. In the theoretical session you will see clinical cases with different special techniques how to solve complex cases. Dr. Kirste will also share his experience with Bonespreading and Transposition plastics. At the end we discuss about materials, treatment concepts, techniques and more. Delegates should also bring their own, X-rays, DVT's or CT Scans and cases to this discussion.

KEY INFORMATION AND REGISTRATION

VENUE: Ariana Dental-Design GmbH
Wilmerdorfer Str. 54, 10627 Berlin
Tel.: 0049 30 69 81 93 03
