Aesthetics.

botiss biomaterials, the leading German specialist for dental bone and tissue regeneration invites you for the 2016 Hands-on Human Cadaver Courses at the Anatomy Training Center of the Medical University of Vienna, Austria.

Course Description

The participants will perform oral implant surgery and soft tissue techniques. 80% of the course is hands-on with 20% lectures about explanations of the techniques and live or video taped dissection/operation (displayed on screen).

A maximum of two participants will be assigned to each cadaver skull. Since the cadavers are fresh and not embalmed, a „close to reality“ simulation of the surgical procedures can be experienced. The faculty is around to support you and will guide you through the whole process. Surgical units, ring technique instruments, implants and disposal material will be provided.

One Step Vertical Augmentation
with allogenic bone rings and state
of the art soft tissue management

Program

Day 1

09.00 a.m. - 05.00 p.m.

Vertical augmentation with allogenic bone rings

- Bone harvesting from the chin
- Biomaterial modelling and fixation techniques
- Maxillary sinus elevation techniques
- Vertical bone augmentation techniques
- Dissection of anatomical danger zone:
lingual+inf. alveolar+mental+infraorbicular nerve,
palatine+facial+submental artery

Day 2

09.00 a.m. - 05.00 p.m.

Soft tissue management

- Techniques for a tension-free wound closure
- Techniques for the restoration of a functional and aesthetic emergence profile
- Mucosal grafts
- Connective tissue grafts
- Biomaterials in soft tissue management:
xenogenic collagen membranes (barrier membranes and tissue grafts)

Faculty

Dr. Bernhard Giesenhausen

Scientific Assistant at the Dental Prosthetics Department at Christian Albrechts University in Kiel. Specialized in implant dentistry since 1980. Lecturer at numerous education events in Germany and other countries since 1995.

Medical Director of the Pro-Implant Institute of Dental Implantology and of the International Training Centre in Kassel since 2003.

Dr. Norbert Fock

10 years as Cranio-Maxillofacial Surgeon at University Hospital in Vienna, since 2004 in private practice, specialized in implant dentistry and bone graft procedures, as well as in aesthetic facial surgery.

Organizer and teacher in postgraduate education program
(www.anatomical-surgical-training.com)

Dr. Darius Pocebutas

Postgraduated in implantology at Goethe University in Frankfurt/Main and has comprehensive international practice experience (Latvia, Sweden, Australia, Germany, Ukraine, Austria, Poland and Denmark).

Partner at Pro-Implant Institute and head of the Pro-Implant Dental Clinic in Kaunas. Founder of the Baltic States' Implantation Club.

Special offer! all-in package

(Valid until 30 days before event)
