

- Do you dread eating out with friends?
- Do you feel less confident due to poor teeth?
- Do you suffer from painful bleeding gums due to poorly fitting false teeth?

Embarrassed about your smile?

Losing teeth can have a huge negative impact on your quality of life. To replace real teeth, conventional dentures are a solution, but they simply don't stay in place which can cause pain, bleeding and discomfort. Not to mention embarrassing situations.

Everyone deserves beautiful teeth. To be able to laugh and speak with confidence, and to eat what you like without discomfort. The dental implant solutions from Straumann help to restore your self-confidence and put a carefree smile back on your face again.

More than half the people wearing conventional dentures are dissatisfied with their false teeth.

Dissatisfied Satisfied

Because you are unique.

Of the millions of people facing dental problems, there are no two solutions the same. Everyone has different expectations, medical history, and needs.

Because one size doesn't fit all, Straumann® Edentulous Solutions provide a wide range of treatment options.

Based on your individual situation, a specific number of dental implants are placed in your jaw. Your new teeth are fixed onto these implants so they stay in place and are as secure as natural teeth.

Option A: Click-fix teeth you regularly remove for cleaning.

You can choose to have implant-fixed teeth that you remove yourself for cleaning. There are different kinds of implants onto which your new teeth can be fixed and different click-fix systems to attach your teeth on the implants.

Straumann® Mini Implant System

COMFORT

LIFETIME PLUS GUARANTEE

In cases where regular implants are not the ultimate choice either for anatomic or financial reasons, your clinician may choose Mini Implants. These implants are very narrow and already include retentive elements to fix and remove your teeth. Mini Implants can be placed in a shorter procedure enabling you to get your teeth back on the same day*. The treatment usually requires fewer visits at the dentist, which can reduce the overall cost.

Immediate placement and function of fixed teeth depend on the primary stability of the placed implants and may not be possible in some of the cases.

Straumann® Novaloc® Retentive System

Depending on your jaw bone conditions, your doctor may choose to place two or more regular implants combined with the Novaloc® Retentive System. This click-fix system product family has been built using modern materials designed for maintenance and higher longevity.

Straumann® Novaloc Retentive System with regular implants

Straumann® Pro Arch Fixed

You look in the mirror and realize you have an unbelievable smile, a smile you've longed for, for so long, and you not only have beautiful smile but a functional smile. Richard, United States

COST EFFECTIVE

QUALITY OF LIFE

With this treatment option, natural looking teeth can be permanently fixed to dental implants with tiny screws. Your dentist will only remove them periodically for cleaning and maintenance. In most cases, your dentist can place your new prosthesis on the day of the surgery, or shortly thereafter.*

Immediate placement and function of fixed teeth depend on the primary stability of the placed implants and may not be possible in some of the cases

Personalized treatment

| Lifetime guarantee*
