

# Sobczak Concept® with Straumann Pro Arch Training course

Sobczak Concept® with Straumann Pro Arch is a unique fully digital treatment protocol, that from the healing period with the temporary bridge, is developed to achieve optimal white esthetics of the superstructure, proper tissue support and occlusal plane.

## COURSE OBJECTIVES

The learning objective of the course is to provide theoretical training and practical experience to successfully manage immediate loading treatment according to the Sobczak Concept® with Straumann Pro Arch surgical and restorative protocol.

## COURSE OVERVIEW

This program is a continuation of the intermediate level Pro Arch course. This course level covers the treatment planning, surgical, prosthetic and laboratory procedures of the full arch immediate load prostheses with a fully digital workflow. The participants will acquire the knowledge in full arch rehabilitations including use of digital solutions and workflow. During the course, participants will follow the actual patient's journey from the first visit, patient selection, advanced diagnosis, surgical & prosthetic treatment and patient's maintenance step-by-step.

After the course, the participants should be able to identify, diagnose, plan and treat these cases with Sobczak Concept® with Straumann Pro Arch.

## TARGET GROUP

Clinicians, who have prior experience with full-arch treatment

## COURSE TOPICS

- Clinical indications and immediate loading
- Patient selection and treatment planning
- Step-by-step surgical and restorative workflow
- Fully-digital protocol and digital tools (Intraoral scanner, Digital impression, STL transfer to coDiagnostiX®)
- Surgical planning and design of the guide using coDiagnostiX®
- Communication with the lab technician in a full digital workflow and bridge design
- Teeth extraction / management of the sockets
- Tilting implants
- Postoperative care and maintenance
- Risks and complications (restorative and surgical)
- Business model / Patient communication & marketing
- **Live surgery**
- **Hands-on training on the models**
