When searching the "Implants" chapter, first select the type of implant – Tissue Level, Bone Level, Ceramic or Mini Implant. Then specify the desired implant diameter. These are marked by colored rectangles on the side tabs of each page. Instruments and accessories can be found in the corresponding chapter.

### More than just an implant: a sense of trust

Every patient is different, every treatment is individualized – Straumann reflects this individuality in its implant products. Whether you choose a Soft Tissue Level, Bone Level or Ceramic implant, all implants offer you, the dentist, **a wide range of options**, simple handling, reliability and safety.

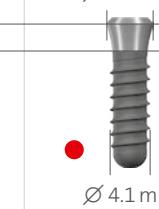

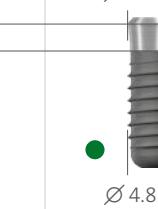

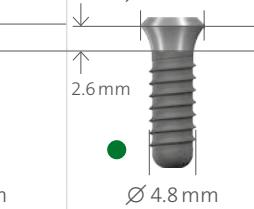

With the Straumann® Dental Implant System, you can cover a wide range of treatment options.

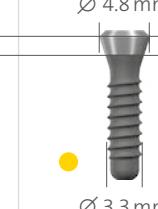

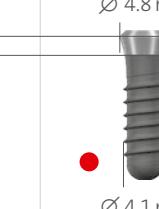

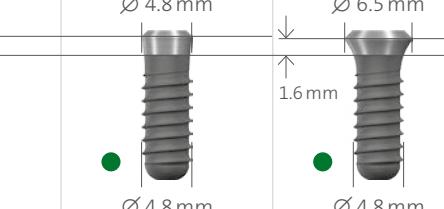

- A system including Tissue and Bone Level Implants for maximum freedom of choice
- SLActive®, SLA® and ZLA® surface technologies for predictable osseointegration
- Choice of high-performance materials – from zirconium dioxide to Roxolid® – to cover a wide range of indications
- More than 15 million Straumann implants sold worldwide

When searching for prosthetic components, first specify Tissue Level or Bone Level, and then search by prosthetic platform. These are marked by rectangles on the side tabs of each page. You will find the corresponding components, ranging from single crown to hybrid restoration. Instruments and accessories can be found in the "Instruments and Accessories" chapter.

### More than just highest precision: a perfectly adjusted system

Straumann offers a wide variety of **implant-borne prosthetic solutions** for **all indications** – ranging from single tooth restorations to edentulous solutions. Our high-quality connection solutions, Straumann® synOcta® and CrossFit®, ensure **safe positioning** of the abutment on the implant and therefore **long-lasting stability**. A broad range of materials combined with a choice of screw-retained, cemented and hybrid restorations complete our portfolio.

#### Original on original

Straumann knows all dimensions, tolerances and materials of all Straumann implants. With this knowledge we tune the design of implants and prosthetic components perfectly to each other. High precision in manufacturing and thorough testing processes ensure the consistent quality of all original Straumann components.

#### Straumann® CARES® for individual CADCAM prosthetics

Straumann® CARES® offers you prosthetic solutions from single tooth restorations to tooth-borne dental bridges, all the way to implant-borne restorations. This is complemented by a comprehensive choice of materials and simple processes. This means precision, a high degree of efficiency and highly aesthetic results in every single product.

What challenge are you going to master today?

Modern dentistry needs specific solutions to ensure maximum performance and security.

### Straumann® Biomaterials: Master any Challenge

We understand that your cases are as individual as your patients. That's why we offer products you feel comfortable with and can depend on, day in, day out. You can trust in the experience and expertise, that is synonymous with Straumann®, to deliver the right solution designed to achieve and maintain your clinical success in different situations. Whatever your patient needs: treatment options for preventing tooth loss, comprehensive biomaterials collection or innovative solutions to keep a healthy status of the tissues surrounding the implant, our carefully selected portfolio provides you with exactly what you require to maintain your success and master your challenges.

Straumann® CARES® encompasses hardware, software and services for high-quality, customized CAD-CAM prosthetics – offering a wide range of materials and applications. Connectivity between surgical planning software and CAD-CAM software opens up new design possibilities for individual esthetics.

### The digital workflow: Make your work easier and improve the predictability of your results

Digitalization is having a major impact on the world of dentistry and dental technology, bringing with it a host of new applications and processes that are fundamentally changing the way treatment is designed. New software and hardware products can increase innovation and efficiency in dental laboratories, while the production of laboratory products can become increasingly decentralized. These trends call for business models to be adjusted to meet growing patient expectations.

#### Note:

\* Straumann® CARES® solutions are available in selected countries. Please contact your local Straumann sales representative for further information.

## Digital Performance

Straumann® CARES® offers an integrated digital solution for dentists and dental labs. Starting with the implant planning software, and using the necessary CADCAM equipment, including materials and services, our open system approach is based on validated workflows to meet your needs in the best possible way.

Synergies between the planning software coDiagnosiX® and the design software CARES® Visual open up a whole new world of opportunities in prosthetically driven implant treatments. Following the outlined CARES® CADCAM workflow, you can scan, design and order a complete range of customized prosthetic components directly from our milling centers, or produce them yourself through our in-house workflow options. The choice is yours – on a case by case basis!

If you do not have access to the corresponding hardware, you can also order your Individual prosthetics via CADCAM systems of other manufacturers or via our Straumann® CARES® Scan & Shape Service.

### Comprehensive product portfolio

Our comprehensive portfolio has a suitable solution for every case – including single-step treatments, customized abutments, screw-retained bridges and bars, and full-contour crowns and tooth-borne bridges.

### Leading range of materials and applications

Straumann® CARES® CADCAM has an extensive material portfolio, providing patients, dentists and dental technicians with a wide choice of options. All dental material types can be processed, enabling you to respond to your customers' wishes with maximum flexibility.

## Digital Performance

### Straumann® CARES® Digital Solutions for dental labs

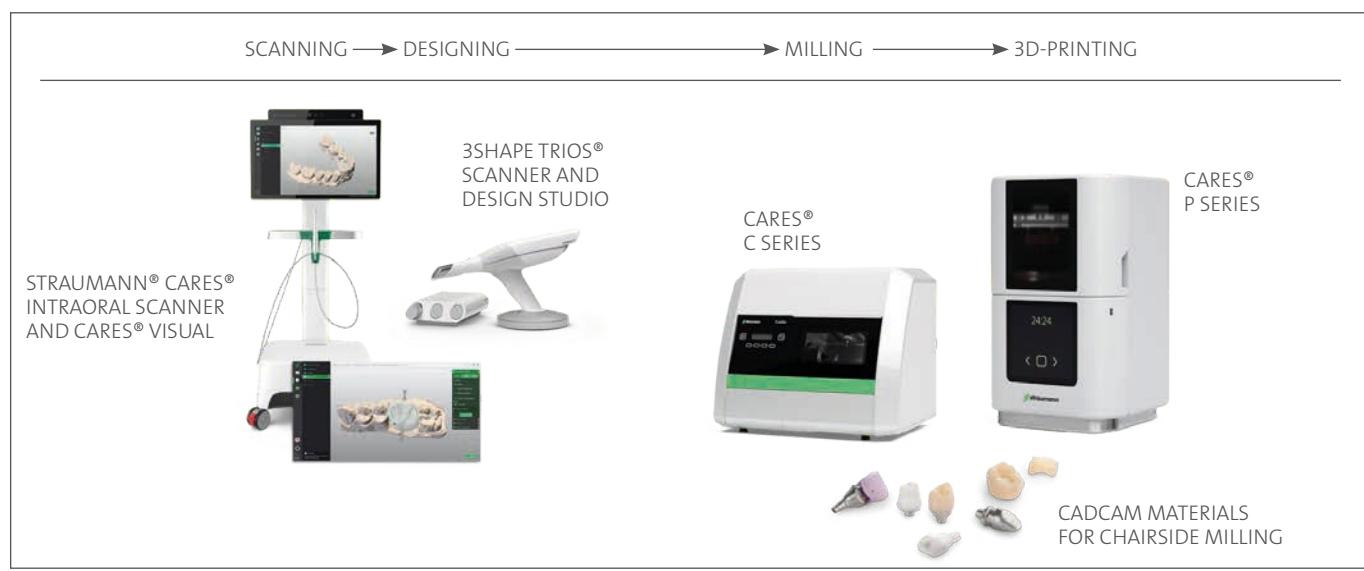

- Provides an all-round solution for dental labs, complemented by our high volume, high precision centralized milling service
- Enables dental labs to produce a wide range of prosthetics from a very broad selection of materials

## Digital Performance

### Straumann® CARES® Digital Solutions for dentists

- Provides a fully-rounded portfolio of integrated solutions, including leading chairside scanning and milling technology, 3D printing and centralized milling as an extension of your practice
- Combines interconnected software platforms, open and fully validated workflows alongside with a wide variety of materials – a truly benchmark in digital dentistry
- Leverages on industry-leading partners to offer cutting-edge customizable and upgradable technology to meet your evolving needs
