

Soft tissue grafting – implications for peri-implant tissue health and esthetics – hands-on course.

PROF. DR. FRANK SCHWARZ

The clinical relevance of soft tissue grafting has emerged over recent years. In fact, considerably evidence has pointed to the effectiveness of soft tissue grafts in the prevention of peri-implant diseases as well as esthetic complications.

This course will provide fundamental insights into indication based surgical techniques and materials for the following major areas, which will be thoroughly discussed (presentation, clinical cases and videos) and exercised in pig jaws:

- Keratinized mucosa
- Peri-implant mucosal thickness
- Soft tissue dehiscences
- Peri-implantitis related defects

PROWADZĄCY: Prof. Dr. Frank Schwarz
TERMIN: 03.06.2023
GODZINY: 9:00-17:00
MIEJSCE: Warszawa
GRUPA: maksymalnie 18 osób
FORMA: kurs z warsztatami na materiałach zwierzęcych
CENA: 3600 zł
3100 zł – Członkowie ITI
